

The following is an introduction to noteworthy feature of APEXFiz Design software version V-08.

Improved convenience and design efficiency for handling Multitexture Fitting data

■ Supported Plans: **Design-Knit** **Design Pro** **3D (option)**
Design-Sox ※ For exclusive use in sock design only

The following new features are now available for Multitexture Fitting data, enabling more efficient and flexible design editing.

- 3D Mapping Editor > 3D Loop Simulation > [Multitexture]
 You can now perform 3D Loop Simulations for Fitting data with multiple textures.
- 3D Mapping Editor > [Exit] > [Real-time 3D View]
 You can now return to Real-Time 3D View from the 3D Mapping Editor menu, even for Fitting data with multiple textures.
- Open 3D Data > Mode [Edit]
 You can now open Fitting data with multiple textures by Mode [Edit] and edit its Loop Project.

Added [Shorter] to 3D Mapping Editor > 3D Loop Simulation > [Change processing time]

■ Supported Plans: **Design-Knit** **Design Pro** **3D (option)**

By shortening the processing time, the appearance of knit structures such as moved stitches or cable patterns is now improved. Additionally, it can help reduce excessive wrinkling in specific areas.
